The IDEAlliance Print Properties Working Group has established a certification process for off-press proofs as input material to publications. In accordance with this process: “The appearance of a hard copy or monitor proof used in this application must have the ability to closely match specific CGATS or other documented characterization data sets within outlined tolerances. See further explanations and recommendations outlined on www.swop.org or www.gracol.org.

The following information is intended to assist producers and consumers in the use of vendor specified proofing materials in an off-press proof application:

I. Manufacturer
Eastman Kodak Company
343 State Street
Rochester, NY 14650 U.S.A.

II. Product
Kodak Matchprint Inkjet Proofing Solution w/ Epson Stylus PRO 800 Printer on Kodak Matchprint Pro Press White SM210P, Type 1 Media

III. Introduction
Kodak Matchprint Inkjet Proofing Solution is based on software developed by Kodak, consisting of innovative screening and calibration technologies, and a certified process incorporating Color Confirmation. Using Kodak Proofing Software, customers will benefit from excellent color accuracy, enhanced image smoothness, quick calibration tools and direct connectivity to Kodak Unified Workflow Solutions. A proof made with a Matchprint Inkjet Proofing Solution, to these Application Data Sheet specifications, is intended to simulate the characteristics of a production press operating within the GRACoL Guidelines for production printing.

IV. Control Guide
IDEAlliance specifies a control guide such as an ADS Proofing Certification Strip be supplied on every off-press proof. As a minimum, this guide should contain solids for the primary process colors (YMCK), two-color overprints (RGB) and a three-color overprint (YMC), as well as a 25%, 50%, and 75% tint in stated line screen resolution of each of the primary process colors and 3-color gray patches. All control guides should be checked for accuracy of the original values. Use and interpretation of a control guide is the responsibility of the creator.
V. System Components

**Hardware and Softgoods:**
- **Epson Stylus PRO 800 Inkjet Printer** with **Epson UltraChrome K3** ink in **Photo Black** mode
- **Kodak Matchprint** Pro Press White SM210P Media
- An **X-Rite DTP-41 Spectrophotometer** with **UV filter** and **white plaque DTP41-55** or **GretagMacbeth Spectroscan** Spectrophotometer with **UV filter** or **GretagMacbeth Eye-One** UV Cut Spectrophotometer can be used for calibration.

**Software:**
- **Kodak** Proofing Software for **Matchprint** Inkjet Solution, v3.1 and above.

**Setup and Protocol:**
- Refer to the **Kodak** Proofing Software’s On-Line Help for the following procedures:
- Download the **Epson x800: Matchprint** Pro PressWhite SM210P installer from the ecentral.creo.com website. Installers can be found in the Self Support > Downloads area.
- Install the installer using the **Kodak** Proofing Software’s Proofer Administrator.
- Calibrate the **Matchprint** Pro PressWhite SM210P 720x720 v1 media configuration.
- Create a hot folder in the **Kodak** Proofing Software using the M8_PWSM210_7_GRCL_C1_6_1v1_a.dvl device link for color management.
- Alternatively, you can apply this device link in your **Kodak Prinergy, Prinergy EVO**, or **Brisque Workflow System** and send proofs from your workflow to the **Kodak Proofing Software**.

VI. Finishing Procedures
None required.

VII. Finished Proof Characteristics
A proof with the color characteristics referenced in Appendix 1 is to be expected when measured from the ADS Proofing Certification Strip or a FOGRA Wedge having been properly made to all the listed system components and finishing procedures.

Note: Three-color grays are comprised of Cyan, Magenta, Yellow: 75, 66, 66; 50, 40, 40; and 25, 19, 19 values.

All measurements for comparison to the **GRACoL 2006 C1** data were made using a calibrated **X-Rite DTP70 Spectrophotometer** (D50, 2 degree observer, UV included, with white backup). All tolerances reflect normal systems variability and assume the use of a calibrated measurement device.

VIII. Sample Proofs
Kodak has supplied three (3) sets of hard copy proofs for retention and has verified that they conform to this Application Data Sheet by an IDEAlliance certifying contractor.
